Chinese Medicine Representatives

Dear All

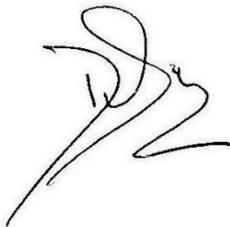

I recently had a positive meeting with the new Minister of Health Hon David Clark.

He has confirmed that the process of regulating Chinese medicine under the HPCA Act 2003 will continue. This is good news for the profession.

Health Workforce New Zealand is continuing with the legislative and organisational requirements for regulation. This consultative process takes time and formal government agreement will still be required before arrangements can be finalised.

I will keep you updated with progress.

Yours sincerely

Professor Des Gorman  
**Executive Chairman of Health Workforce New Zealand**
